

## I. Frequently Asked Questions

Nucleic Acid FAQs	70
Protein Analysis FAQs	72

## II. Preparation of Agarose Gels

Agarose Selection Guide	76
Agarose and Compatible Techniques	76
Agarose Types	77
Agarose Analytical Specifications	79
Suggested Agarose Concentrations and Dye Migration Information	80
Buffers for Electrophoresis	81
Dissolving Agarose	83
Casting Agarose Gels	85

## III. Loading and Running DNA in Agarose Gels

DNA Loading	90
Loading Buffers	91
Optimal Voltage and Electrophoretic Times	92
Fast Running Protocols for High Resolution in MetaPhor® Agarose Gels	93
References	94

## IV. Detection and Sizing of DNA in Agarose Gels

Guide to Lonza Ladders and Markers	96
Detecting DNA with GelStar® and SYBR®	
Green Nucleic Acid Gel Stains	98
Detecting DNA with Ethidium Bromide	102
High Sensitivity Detection Using the FlashGel® System	103
References	104

## V. In-Gel Reactions

Overview	106
Tips for Increasing the Efficiency of In-Gel Reactions	107
Cloning in the Presence of Agarose	108
Restriction Digestion in the Presence of Agarose	112
DNA Amplification in the Presence of Agarose	113
References	113

## VI. Recovery of DNA from Agarose Gels

Tips for Increasing DNA Recovery Efficiency from Agarose Gels	116
β-Agarase Recovery of DNA from Agarose Gels	117
Electroelution of DNA from Agarose Gels	126
Phenol/Chloroform Extraction of DNA from Agarose Gels	122
“Modified Freeze/Squeeze” Extraction of DNA from Agarose Gels	123
Ethanol Precipitation of DNA Recovered from Agarose Gels	124
References	124

## VII. Separation of DNA in Polyacrylamide Gels

Separating DNA in Polyacrylamide Gels	126
Detecting DNA in Polyacrylamide Gels	127
Recovery of DNA in Polyacrylamide Gels	129
References	130

## VIII. Separation of RNA in Agarose Gels

Introduction	132
Preparation of RNA Samples	132
Buffers for RNA Electrophoresis	134
Electrophoresis of RNA	134
Detection of RNA in Agarose Gels	138
Detecting RNA with Ethidium Bromide	142
Northern Blotting	143
FlashGel® Systems for RNA Analysis	146
References	145

## IX. Special Applications in Agarose Gels

Amplification of Plasmid cDNA Libraries with SeaPrep® Agarose	150
Preparing Agarose for use in Cell Culture Applications	152
References	154

## Table of Contents

Table of Contents — continued

### X. Protein Separation in Polyacrylamide Gels

Buffers for Protein Electrophoresis	157
Casting Polyacrylamide Gels	157
Loading and Running Proteins on Polyacrylamide Gels	159
Loading Buffers	160
Optimal Voltage, Running Times and Power Settings	161
ProSieve® 50 Gel Solution	161
PAGEr® Gold Precast Polyacrylamide Minigels	162
Chamber Modification Instructions	164
Detection of Proteins in Polyacrylamide Gels	166
SYPRO® Protein Gel Stains	166
Coomassie® Blue Stain	168
Silver Stain	169
References	170

### XI. Blotting Proteins from Polyacrylamide Gels

Introduction	172
Semi-dry Blotting PAGEr® Gold Precast Gels	173
Tank Blotting PAGEr® Gold Precast Gels	174
References	175

### XII. Isoelectric Focusing of Proteins on Agarose Gels

Introduction	178
Preparation of Isoelectric Focusing Gels	179
Running Agarose IEF Gels	182
Staining Proteins in Agarose IEF Gels	184
Press Blot Transfer of Proteins from Agarose IEF Gels	188
Preparative Isoelectric Focusing	189
Immunofixation/Immunoperoxidase or Autoradiography	190
Direct Tissue Isoelectric Focusing	191
Resolution Reference Guide	192
References	194

### XIII. Protein Separation in Agarose Gels

Introduction	196
Buffers for Protein Separation in Agarose	197
Casting Agarose Gels for Protein Separation	198
Preparation and Loading of Protein Samples	198
Optimal Voltage and Electrophoretic Times	199
Detection of Proteins in Agarose Gels	199
Gel Drying and Preservation	200
Processing Agarose Gels Following Electrophoresis	200
Recovering Proteins from Agarose Gels	201
References	202

### Appendix A. Electrophoretic Theory

Voltage, Current and Power; Interactive Effects on Gel Electrophoresis	204
Electrophoretic Parameters	205

### Appendix B. Agarose Physical Chemistry

Agarose Physical Chemistry	208
References	209

### Appendix C: Safety

Safety and Environmental Precautions	210
